

# HOW WOULD YOU GRADE CALIFORNIA?

The California Report Card Version 2.0 is an online platform that allows you to grade the state of California on timely issues and propose issues to be graded on future report cards.

Version 2.0 is designed to engage the 30% of Californians who speak Spanish at home. All content is now available in English and Spanish, with rapid translation of new input and a streamlined new graphic design.

The platform was developed by the CITRIS Data and Democracy Initiative at UC Berkeley and the Office of Lt. Governor Gavin Newsom to encourage communication between the public and government leaders.

MAKE YOUR VOICE HEARD. **GRADE CA.**
